

MAJOR TRAUMA WARD

REFERRAL FROM QEUH ED

- Injuries > 1 body region & require in-patient care* from > 1 specialty
 - Significant injury to a single body region eg:
 - High energy pelvic fractures
 - Chest wall injuries
 - High energy open long bone fractures
 - Multiply-injured patients requiring single specialty input but who would benefit from the specialist nursing and rehabilitation specialists available via the MTW
 - Non trauma call patients with the above injuries can also be admitted to the MTW, please discuss with the MTW team
- * Care = surgical intervention or ongoing review, monitoring and investigation.

Excludes

- Patients with an isolated head injury
- Patients with a single system injury that can be managed by a single specialty that do not meet the above criteria
- Patients requiring critical care support
